## **Capability Enhancement and Development Schemes**

**2018-19**

### **Bridge Courses**

Bridge courses are generally applied for students to fill the gap between subjects studied at the pre-university level and subjects they will be studying in their degree program.

How the bridge course is helpful for students?

- Helps in increasing critical thinking about key concepts and theories
- Increase the learning abilities of the student for an upcoming course/degree.
- Clearing some of the tricky concepts in their main course/degree program.
- Norms for conducting bridge courses.
- It must be University/College approved.
- The course should fill the gap between pre-university and university degree.
- The course must be designed in such a way that the basic concepts of the students should be cleared for the upcoming degree program.
- It must be helpful in their main degree program.
- In the case of an industry-oriented program, the course content must be training oriented.
